Water Mills

Town Mill

Mill Lane, Lyme Regis, Dorset, DT7 3PU
+44 (0) 1297 443579

The earliest evidence of a mill on this site is from 1280 and the current building dates from 1648. The water wheel was removed in 1936. The town mill trust was started in 1991 and the restored mill was opened in 2001. In 2007 a hydro-electric system was installed and other additions to the building have completed the project.

There is a mill shop where you can purchase the wholemeal flour. In addition, there is a tea room, a gallery and craft shop. Check the website for opening hours and costs.

I have visited the Town Mill and this is an enjoyable attraction in the town. The flour is excellent and the tour is generally conducted by the miller.
